

MIGHTY-LOK®

The molded polymer pad face has hundreds of individual hooks that grip into the threads of a floor pad and hold it securely while operating. The solid block includes a built-in riser and showerfeed holes allow use with solution dispensing machines.

PAD-LOK™

Heavy polypropylene strands trimmed offset at 1/2" are staple set in our TUFF-BLOCK®, making this the superior tufted pad driver choice. Tufts penetrate into the pad for secure holding power. Includes our 1-1/4" thick plastic riser. (Can also be ordered without riser.)

SURE-LOK®

The SURE-LOK® System is an exclusive Malish design for use on dual and high speed (300 rpm) machines. The SURE-LOK® face combines our MIGHTY-LOK® molded polymer pad gripping material with a foam cushion to absorb vibration and a stiff plastic backing to stabilize the unit. SURE-LOK® REQUIRES THE USE OF THE HIGH SPEED RISER (D)

HIGH SPEED RISER

The High Speed Riser further smooths operation of the SURE-LOK® System. Works with all Malish standardized 5" center hole Clutch Plates, including the NP-9200 TRU-FIT® Universal Clutch Plate.

Clutch Plate

Tru Fit univiversal clutch plate is designed to flex vertically and compress horizontally to reduce machine wobble and operator fatigue.

Risers

Plastic risers are available in thicknesses of either 1-1/4" (standard) or 1-1/2". Marine grade plywood risers are available for use on wood blocks or when non-standard center hole dimensions are required.

MAL-GRIT™

MAL-GRIT™ brushes offer solutions to a wide range of cleaning situations. Silicone carbide impregnated nylon bristles are self-replenishing as brush wears, offering unmatched value that outlasts floor pads over 100 to one! That translates directly into time and cost savings. Featuring our water and chemical resistant TUFF-BLOCK® for maximum life expectancy. All Grit Brushes with must be run in a wet environment. Trim Length: 1-1/2". Our most popular Grit brush. An aggressive brush for general scrubbing or stripping finishes from hard surfaces. Effectively cleans wide grout lines.

WARNING! Do not use brush or pad with flammable materials (fuels, solvents, thinner, etc.) or serious bodily harm or injury could result from possible fire or explosion.

POWER-PAD™

Cutaway view of POWER-PAD™ in use.

The Malish POWER-PAD™ is a unique combination of a brush to handle all the "lows" and a pad driver to clean all the "highs". This design creates a multi-level scrubbing action that produces results superior to standard rotary brushes and pad drivers. Reduces the need for multiple passes during floor stripping or scrubbing. Ideal for use on unsealed or sealed concrete, terrazzo, vinyl tile, ceramic/quarry tile and linoleum.

**BLACK
Stripping**

Combines our most popular Grit brush with a pad driver for general scrubbing or stripping finishes from hard surfaces. Effectively cleans wide grout lines.

**BLUE
Scrubbing**

An excellent general scrubbing brush/pad combination for frequent maintenance cleaning. Flexible enough for cleaning narrow grout lines and uneven surfaces.

**GREY
Light Scrubbing**

A perfect union of durable brush and pad driver with minimum aggression. For daily scrubbing of a variety of tiles, marble, terrazzo and non-slip epoxy finishes.

**GENERAL PURPOSE
BRUSH**

For cleaning hard surfaces. Nylon and polypropylene scrubbing brushes feature .028" diameter fill material throughout the block. Nylon is more flexible and will last the longest, while polypropylene is an economical alternative. Steel Wire (.014" diameter) is the most aggressive of the series, for use on unfinished concrete surfaces.

CARPET BRUSH

On brushes 14" diameter and larger, the two outer rows are heavier to scrub the carpet and flex the pile while the softer inner rows "massage" the dirt from the carpet for deeper cleaning action.

All Malish showerfeed brushes feature our water and chemical-resistant TUFF-BLOCK® Showerfeed System for improved performance and long lasting life.
